Division of American Retroworks Inc

PO Box 1010, 84 Feed Mill Lane
Middlebury, VT 05753 www.retroworks.com

Asset Recovery and Recycling Certificate

Issued to _____ date _____

This statement certifies that the electronics equipment sent by your organization for asset recovery and recycling has been received and unloaded at our Good Point Recycling warehouse, 84 Feed Mill Lane (Exchange Street), Middlebury, Vermont.

American Retroworks Inc. certifies it has accepted ownership and responsibility for all electronic material delivered to our site for recycling, as identified on an itemized list (attached, to be provided by the client). Any reused assets are handled in accordance with all software piracy laws, and all personal, non-transferable, or proprietary information are erased, or the hard drives are destroyed. All unrecoverable assets are managed and recycled according to specifications set out by the EPA, the Vermont Agency of Natural Resources, and the Massachusetts Department of Environmental Protection. Leaded CRT glass, which fails RCRA TCLP Tests, is recycled exclusively under the Massachusetts state CRT recycling contract by ElectroniCycle Inc. of Gardner, MA (contract Reference No: DEP-CRT2000A, available at www.comm-pass.com) in compliance with all local, state and federal laws and regulations.

If necessary, we will provide individual hard drive serial number tracking, or CRT tube serial number tracking, for an additional fee of \$3.85 per machine. This is required only for commercial firms doing business with the Department of Defense or which have internal requirements. This certificate will be enforceable from the point of collection (does not cover data compromised internally at your site or via 3rd party collectors).

Signature: _____

President, American Retroworks Inc, DBA Good Point Recycling
