Experience:

Robin Ingenthron is president of American Retroworks Inc., a consulting and recycling services organization specializing in reuse, repair, and recycling used goods such as electronics and household goods, both domestically and for export.

Robin Ingenthron was Director of the Massachusetts Recycling Program at the state Department of Environmental Protection before accepting a promotion to Deputy Director of Consumer Programs at DEP in 1998.

Robin has led two private not-for-profit recycling organizations, and is currently vice president of ElectroniCycle Inc. (the largest TV recycling company in the Northeast USA). He has a BA degree in International Relations (Carleton College, 1984) and an MBA from Boston University (Public Management Program, 1989). He was both a volunteer and a country training consultant for the US Peace Corps (1984-86).

Robin is currently consulting for the Guangzhou Electric Appliance Research Institute (GEARI) concerning recycled copper scrap operations in China (Sept. 02-Oct 02).
